

Brain Injury Support Group

Second Wednesday of Each Month 6:30 p.m.

HealthSouth Rehabilitation Hospital of Middletown

Brain injuries change lives. Our goal at HealthSouth Rehabilitation Hospital of Middletown is to help individuals and their caregivers living and coping with the effects of traumatic brain injuries. A support group is an environment where positive and negative feelings can be expressed without judgment. Here you can meet others with similar experiences, offer support, share information and learn about community resources. Sessions are facilitated by a Brain Injury Association of Delaware board member and a HealthSouth Middletown team member.

To learn more about our support group or rehabilitation programs, please call 302 464-3400.

At Wawa, turn at light onto Gloucester Blvd. Follow traffic circle to third entrance and onto Hampden Road.
